Software Engineer

OBJECTIVE

Recent college graduate with a BS in Computer Science and nearly 30 years of various work experience. Seeking to leverage acquired academic knowledge and background to effectively transition to a new career as a software engineer. A dedicated worker, proven quick learner, and problem solver that is eager to contribute to the company's overall growth and focus of the customer experience.

EDUCATION

Bachelor of Science in Computer Science, December 2019

Western Governors University, Salt Lake City, Utah

- Excellence Award - For exemplary work in the Introduction to Artificial Intelligence

COURSEWORK

- | | |
|-------------------------------|--|
| • Calculus I | • Scripting and Programming – Found. & Appl. |
| • Software Engineering | • Data Management - Foundation & Application |
| • Computer Architecture | • Software I & II - Advanced Java Concepts |
| • Technical Communication | • Introduction to Artificial Intelligence |
| • Structured Query Language | • Data Structures and Algorithms, I & II |
| • Software Quality Assurance | • Business of IT - Project Management |
| • Discrete Mathematics I & II | • Network and Security - Foundation |
| • Web Development Foundation | • Operating Systems for Programmers |

SKILLS

Python Java PHP Javascript SQL HTML CSS

PROJECTS

[Computer Science Capstone, \(December 2019\)](#). Created web app containing login, dashboard, and several charts and graphs displaying prediction model and data set for diagnosis of heart disease. Technologies used were Django for the framework, Bootstrap and jQuery for styling, and multiple Python libraries to create the predictive model and data visualizations. Libraries such as pandas, seaborn, numpy, matplotlib, sklearn, and dash were all involved in the project. Deployed on Heroku with these login credentials (username: admin, password: CAPstone)

[Software II Project, \(August 2019\)](#). Created an appointment app with a login that can add, update, and delete customer records and appointments, along with a calendar feature built with JavaFX components. Project built with Java using NetBeans IDE and Scenebuilder for the frontend and MySQL for the backend.

[Recipe web app](#) and [Personal website](#). Personal side projects that were built with PHP using the Laravel framework and Postgresql that were deployed on Heroku. Several other personal project repositories are also located on my Github profile.

CERTIFICATIONS

Oracle Database SQL Certified Associate 1Z0-071, (10/28/2019)
CompTIA Project+, (5/2/2019)
CIW Site Development Associate, (2/4/2019)
Axelos ITIL Foundation Cert, (10/18/2019)

EXPERIENCE

Ingram Micro, Inc • Irvine, CA (November 2011 – April 2019)
